Capturing the pulse of the nation

July 2024

Introduction

India, being a developing economy, has exponential growth potential, which makes it an attractive investment destination globally. One way to participate in India's growth story is through investment in Indian blue-chip companies.

Blue-chip companies are renowned for their stability, reliability and long - standing reputation in the financial markets. These firms are typically industry leaders with established track records of profitability. Investing in blue-chip companies is often a cornerstone of a diversified investment portfolio, offering investors a sense of security and steady returns amidst market volatility.

These companies are characterized by large market capitalizations and greater liquidity. These companies

contribute to the economy by generating employment, increasing production, attracting foreign capital and providing stability and confidence to the financial markets of a country. The Nifty 50 includes fifty of the largest and most actively traded stocks across various sectors listed on the NSE. It serves as a barometer of the Indian equity market and is widely used by investors, analysts, and fund managers to gauge the performance of the country's blue-chip companies. It has played a pivotal role in helping investors assess the pulse of the Indian Capital Market in the last 28 years. Although comprising of only 50 stocks, it represents approximately 57% of the free-float market capitalization of all stocks listed on the NSE.

About Nifty 50 Index

The Nifty 50 index has a base date of November 03, 1995. It represents the country's top 50 blue-chip companies across various sectors. The weight of each stock in the index is based on its free-float market

capitalization. The index is reviewed on a semi-annual basis in March and September using 6-month average data as of January 31, and July 31 respectively. The index construction steps are highlighted below:

Exhibit 1: Nifty 50 index methodology

Coverage of the Nifty 50 index:

The Nifty 50, comprising 50 blue chip companies, collectively represent approximately 47% of the total full market capitalization, around 57% of the total free-float market capitalization, and approximately

28% of the total liquidity of all the traded equity stocks on the NSE, based on a 6-month average as of March 28, 2024.

Exhibit 2: Coverage of the Nifty 50 viz-a-viz all listed and permitted to trade equity stocks on NSE

*Based on 6-month average March 28, 2024 ended data

Evolution of Nifty 50

Since its inception in November 1995, the Nifty 50 index has witnessed remarkable growth in its market capitalization coverage, expanding from 33.7% to 47.35% of the total traded equities at the National Stock Exchange (NSE) as of March 2024.

In terms of turnover coverage, the Nifty 50 index has also experienced notable changes over the years. Initially standing at 62.2% in November 1995, the average turnover coverage has moderated to 28.34% as of March 2024.

Weights of the sectors are as on December 31 for the respective year. Weights for 2024, 2019 and 2014 are calculated based on Free-Float market capitalization; Weights for 2005 and 1995 are based on Full market capitalization. *Weight of sector for 2024 are as of March 28, 2024 based on Free-Float market capitalization.

Twelve companies present in Nifty 50 since inception

Exhibit 7: Companies present in Nifty 50 since inception

Each of the 12 companies in the above table have been in the index from inception till March 28, 2024.

*HDFC Ltd. was part of the Nifty 50 index until its merger with HDFC Bank Ltd. in July 2023.

Nifty 50 Index Performance

Exhibit 8: Performance of Nifty 50 since inception

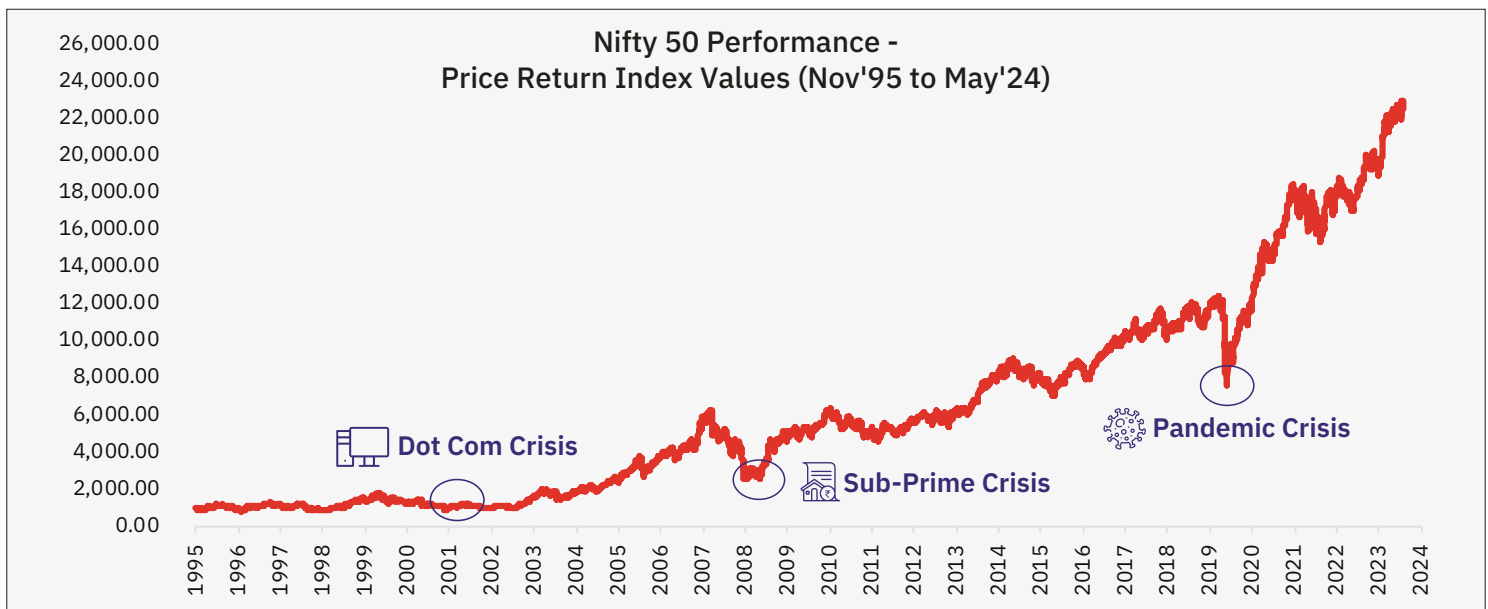

Exhibit 9: Annualized return and volatility profile of Nifty 50 TR index

Annualised Return and Annualised Volatility Profile of Nifty 50 TR index (As of March 31, 2024)			
Period	Returns	Volatility	Return to Risk
Since Inception (June 30, 1999)	14.10%	22.25%	0.63
15 years	15.63%	18.05%	0.87
10 years	14.16%	16.48%	0.86
7 years	14.93%	17.21%	0.87
5 years	15.28%	19.07%	0.80
3 years	16.31%	13.71%	1.19
1 year	30.08%	9.77%	3.08

Returns are calculated based on TR index values. Returns greater than one year are annualized, the returns up to one year are absolute returns; The TR values of the Nifty 50 index are available from June 30, 1999.

Since June 30, 1999, the Nifty 50 Total Return (TR) index has delivered annualized returns of 14.10% with annualized volatility of 22.25%. TR index assumes dividends are reinvested in the index and hence represents both Price Return (PR) and Dividend return. The Nifty 50 TR index has delivered a 15.63% CAGR, 15.28% CAGR and 30.08% CAGR over the last 15 years, 5 years and 1 year respectively. In September of 2023, the Nifty 50 crossed the 20,000 mark. Volatility has

been 18.05% over the last 15 years, 19.07% over the last 5 years and 9.77% over the last 1 year. Over the last 3 years, the Nifty 50 index had a return to risk ratio of 1.19.

While the volatility of the index returns has varied, overall, the index has maintained a reasonable risk-return profile.

Calendar Year Returns for Nifty 50 TR index

The Nifty 50 TR index showed a mix of positive and negative returns over the last 25 years. It experienced significant volatility during the global financial crisis in 2008 but rebounded strongly in subsequent years. The

years 2013, 2015, 2016, 2018 and 2022 had relatively lower returns, while 2014, 2017, 2019, 2020, 2021, and 2023 witnessed stronger performance.

Exhibit 10: Calendar year performance of Nifty 50 TR index

Return based on TR index values. Return for 1999 is calculated from June 30, 1999, to December 31, 1999. Return for 2024* is calculated from December 29, 2023 to March 28, 2024

The Nifty 50 TR index has delivered positive returns in 20 out of 25 calendar years. Returns were between 0% to 10% in 5 calendar years, 10% to 30% in 8 calendar years and exceeded 30% in 7 calendar years. Out of the

5 calendar years where the Nifty 50 TR index had negative returns, returns were between 0% to -20% in 3 calendar years and less than -20% in 2 calendar years.

Source: NSE Indices. Analysis period is from June 30, 1999 to March 28, 2024; Data based on TR index values.

The Nifty 50 TR index has delivered positive returns ~93% of the time over horizons of 3 years, based on daily rolling return analysis. As the investment horizon increased to 7 years and longer, the frequency of positive returns approached 100%. For the 10-year horizon, the maximum return was 22.39% and the minimum return was 5.13%, the average return being 14.20%. For the 7-year investment horizon, the Nifty 50 TR index has delivered an average return of 14.93% based on daily rolling return analysis, with a return of more than 15% p.a. for 37% of the time. Likewise, for the 5-year investment horizon, the Nifty 50 TR index delivered an average return of 15.33% based on daily

rolling return analysis, and a return of more than 15% p.a. for 36.4% of the time.

Overall, the analysis shows that for longer investment horizons, such as 10 years and 7 years, the Nifty 50 index has consistently delivered positive returns. The median and average CAGRs are relatively stable across different horizons, indicating a consistent performance by the index. However, for shorter-term horizons, such as 1 year and 2 years, the index has shown more variability in returns, with ~18% to ~24% instances experiencing negative returns.

FY 2024 the year in review:

a) Automobile and Auto Components, Financial Services and Oil, Gas & Consumable fuels were the top 3 contributors to the returns generated by Nifty 50 in FY 2024

The table below, summarizes the contribution of each sector to the total return of the index for the last financial year (2023-24). As can be seen, the Automobile and Auto Components, Financial Services and Oil, Gas and Consumable Fuels sectors have been among the best performers while the Chemicals Sector contributed negatively to the index return.

Diving deeper into these annual contributions, the table below also showcases the quarterly contribution of

each sector to the overall index return. The top performing sectors – Automobile and Auto Components and Oil, Gas and Consumable Fuels have given positive returns in each of the 4 quarters whereas the Financial Services Sector exhibited volatility with alternating positive and negative returns in each quarter. The Chemicals sector has consistently given negative returns in each quarter, thereby taking away from the annual return.

Exhibit 13: Sectoral Contribution to the Index Return

Sector	Annual Contribution	Quarterly Contributions			
	Mar'23 to Mar'24	Apr-Jun (Q1)	July-Sep (Q2)	Oct-Dec (Q3)	Jan-Mar (Q4)

Signing off.....

The Nifty 50, comprising 50 large Indian companies, is India's flag ship Index, these 50 companies collectively represent approximately 47% of the total full market capitalization, around 57% of the total free-float market capitalization, and approximately 28% of the total liquidity of all the traded equity stocks at the NSE, based on a 6-month average data as of March 28, 2024.

As of March 28, 2024, the Financial Services, Information Technology, and Oil, Gas and Consumable Fuels sectors dominate the composition of the Nifty 50 index, with their weights collectively adding up to 59.44%.

From June 30, 1999, till March 28, 2024, the Nifty 50 index has delivered 14.10% CAGR with annualized volatility of 22.25%.

The Nifty 50 index has delivered positive returns in 20 out of 25 calendar years.

On a daily rolling return basis, the Nifty 50 has delivered positive returns, 100% of the time over the longer horizon periods of 7 years and 10 years.

Automobile and Auto Components, Financial Services and Oil, Gas and Consumable Fuels were among the top contributors to the index return in the last financial year while the Chemicals sector contributed negatively.

The impressive growth in AUM of the passive funds on the Nifty 50 reflects the increasing adoption and recognition of the Nifty 50 as a preferred benchmark in the Indian equity market. As of March 28, 2024, there are 37 passive funds (18 ETFs and 19 Index Funds) tracking the Nifty 50 index with a total AUM of Rs. 3297 billion.
