## Investment Approach

Participate in a range of **domestic and global impact commodity sectors** through a **flexi cap equity strategy**

Aiming for **risk-adjusted equity returns** through **diversification, sector rotation, and dynamic rebalancing**

Participate in **underlying commodity cycles** that are sensitive to global events creating **profit opportunities**

## Reasons to Buy

- Explore a **new category of “real” assets** such as agricultural products, metals, and bullion etc.
- A broad-based portfolio of **equities, ETFs, ETCDs that offers optimal diversification**
- Accelerated inflation causes spike in commodity prices and investment in commodity sectors may provide the portfolio with a **hedge against inflation**
- ESG has a key role to play towards a more sustainable and profitable commodity sector throwing up **new age opportunities**

## VLRT Framework | Adaptive Money Management

*Being Relevant with ‘predictive analytics’*

### VALUATION ANALYTICS

Knowing the difference between price and value.

### RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

### TIMING

Being in sync with the waves of value and behaviour

### LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The **core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant.** Our unique analytical framework for enabling ‘predictive analytics’ encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

#### Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
